DETAILED ACTION

Response to Arguments

Applicant's arguments filed 4/26/10 have been fully considered but they are not persuasive. The applicant argues that prior art of Hedegaard does not teach fastening portion having an inner and outer part with the pelt being secured between. The examiner disagrees as Hedegaard teaches a gripping member with an inner 16 and outer 8 portion with the pelt 6 is located there between.

Drawings

The drawings were received on 4/26/2010. These drawings are not accepted. The applicant failed to overcome the objection as there are fuzzy lines and shading in Figs. 1-3.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hedegaard (WO 02/44428). Hedegaard teaches a pelting machine including a pelt board 4 comprising a holding means 10 for holding a lower end of the board and gripping elements 8 (outer), 16 (inner) for fastening the pelt 6 substantially gripping the whole periphery of the pelt, the gripping parts having inner and outer parts where the inner parts 16 are engagable between a surface of the pelt board 4 and the leather side

of the pelt 6 and the outer parts 8 being placed towards the fur side of the pelt 6. The stretching of the pelt is done by displacing the holding means 10 from the gripping means 16. Hedegaard teaches (page 5 lines 13-19) the use of a bag to secure the pelt to the board and loosening of the gripping means and holding means.

As to claim 10 and 12, Hedegaard teaches (page 5 lines 1-6) a vibrator unit 20 which provides vibration on pelt board in the longitudinal direction. The vibration would be felt on the gripping and holding means.

Allowable Subject Matter

Claims 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
